

# How To Iron-on Decoupage

Passionate Painted Lady

# Supplies Needed

To complete this tutorial on any craft you will need:

- Iron
- Mod Podge
- Towel
- Paintbrush or foam brush
- The item you want to decoupage
- Paper or material of your choice

# Gather your materials

With this method, there are many different things you can decoupage on. Such as wood, plastic, furniture and more. If you can iron on it, it can be done. I have done this on furniture, wood cut-outs, plastic reindeers and poster board cutouts.

# Step 1

To begin you need your item of choice, material or paper, mod podge, a paintbrush, and a towel. Spread your towel out.

## Step 2

Apply a thin coat of mod podge to the item of your choosing. Let that dry for approximately 20 to 30 mins. You will know when ready mod podge will not be glossy.

## Step 3

Once mod podge is dry place your material or paper over your project. If using wood cut out you can cut paper or material first if you like by tracing item out and cutting with a pair of scissors

## Step 4

Turn iron to 300 degrees or medium setting and allowed it to heat up properly. If doing this on furniture you can skip the towel step. Place the item with mod podge already on and dried on a towel. Place paper or material on top of the item. Make sure you are lined up properly.

## Step 5

Place iron on top and iron. Moving iron slowly especially around edges to make sure you get a complete seal. Mod podge will adhere to paper or material. The heat reactivates the mod podge and gives it a great bond to the item.

## Step 6

Once dried you may want to apply a thin coat on top especially if applying on furniture.

All done!

I love doing the Decoupage this way it is so simple and easy. If applying to furniture and you have a jagged edge, material or paper hanging over, take a sanding block and go over the edges lightly. This should remove the extra.

# About Me

Welcome! My name is Annie Sprinkles. I love to inspire and create. Transforming the old, outdated, unwanted, and unloved pieces into fabulous and loved pieces once again is what I do. In addition to being a furniture artist, I am also an avid DIYer and crafter. I'm glad you are here, and hope that you will continue on my journey with me.
